

Rock-a-Bye Chair

A wall-mountable and foldable nursery rocking chair, "Rock-a-Bye," offers a space-saving, safe, and convenient furniture solution with minimal-effort rocking components.

Researchers at Purdue University have developed a wall-mountable and foldable nursery rocking chair. Due to the multiple pieces of furniture commonly found in modern nurseries, many families living in smaller spaces may not have room for a rocking chair. The rocking chair developed at Purdue, termed "Rock-a-Bye", instead combats this issue as the chair can be mounted and stored against a wall and fold out when needed. The chair is also equipped with components that allow the chair to be rocked with minimal effort. Suitable for any room, the Rock-a-Bye chair's design provides parents substantial comfort and convenience.

Advantages:

- Space-saving
- Wall-mountable
- Foldable
- Safe

Applications:

- Nursery furniture

TRL: 4

Intellectual Property:

Provisional-Patent, 2024-11-12, United States | Utility Patent, 2025-11-04, United States

Keywords: Rocking chair, nursery furniture, space-saving chair, wall-mountable chair, foldable rocking chair, Rock-a-Bye, compact furniture, minimal effort rocking, baby furniture, nursery rocker, babies, Furniture, glider, gliding, Infants, Materials and Manufacturing, Medical/Health,
